To Review all of the past Issues please go to our [VMOA MAGAZINE PREVIEW](#), or click on the link, on the right side bottom of the screen, which will open the V-Boost magazine Master Index page. There you will find every magazine ever published with a synopsis of each issue along with a photo of the cover.

All members are encouraged to submit any V-max, V-Boost, or VMOA related articles, comments, and/or photos for use in the magazine. Text submissions forwarded as part of an email message are preferred but almost any format is acceptable. This would include MS Word, Word Pad, Notepad or plain text documents as email attachments or even plain paper with typewritten or legible handwritten text.

Suitably sized digital photos are preferred as they provide the most flexibility when adjusting for appearance and actual placement within the magazine. Please be aware that photos appearing in the V-boost are used at a minimum resolution of 300 dpi. This means that any digital photo that you submit will usually have the ability to appear in the magazine at approximately 1/3 the size it appears on your computer screen. This makes a 640x480 pixel 72dpi screen photo pretty much the minimum practical size that can be used. So please set your camera to "Fine" or "Super fine". This will give you a large file size. Good quality photos may be manipulated with a great deal of success, it is always easier to reduce a photo than enlarge it and of course every effort will be made to use anything received. If you would like a photo considered for a cover please take the photo in the "Portrait" format, in other words, turn the camera on it's side.

Individual email submissions including digital photos or other material should be limited to a maximum size of 4 megabytes each for ease of handling. Actual photo format is not important but generally a "jpg" format photo as large as 1600x1200 pixels will transmit at less than 1 1/4 megabytes in size. It helps if you use a "Zip" utility to compress your photos and text file...

We also accept regular Photos, hand written letters, reviews, tech tips, event reports, ETC... by regular mail. Any photos or other material received non-electronically will be returned if requested.

If you have questions regarding the suitability of any material for submission please contact the [V-Boost Magazine Editor](#) for assistance.

Email address for 'electronic' submissions:
